Summary

Senior Product Designer with 5+ years of experience designing enterprise products that simplify complex business operations across banking, government, healthcare, and telecommunications. Specializes in translating fragmented workflows into AI-enabled digital products through customer research, systems thinking, and data-informed design, delivering measurable business impact.

Experience

PwC India • 2 years 10 months

Senior Product Designer

Oct 2023 - Present

Design lead across enterprise transformation programs in banking, government, healthcare, and telecom. I own problems from discovery through design systems and engineering handoff.

Key Projects/Client

City Union Bank

A digital banking redesign for elderly customers, cutting everyday journeys down to the fewest steps and plainer language so older users could bank on their own. CSAT rose from 7.0 to 9.2, self service adoption up 30%.

IndusInd Bank

The bank's design system, built end to end in Storybook, so new products were composed from one source of truth instead of rebuilt from scratch each time.

Mobily Business

A single B2B self service platform for enterprise account teams, consolidating billing, subscriptions, support, and account management that had lived across disconnected tools.

Torrent Diagnostics

An AI diagnostics app that helps people stay on top of their health, tracking results over time, reading lab values in plain language, and guiding them to the right test to book. Led design and shipped to production.

Nykaa India • 1 year 8 months

Product Designer

Apr 2023 - Sep 2023

Built 0 ->1 Nykaa's AdTech platform, letting brand managers launch, manage, and review ad campaigns and product visuals on their own, without depending on internal teams.

Associate Product Designer

Jan 2022 - Mar 2023

Rebuilt experience of the retailer's ordering journey, end to end around where orders were being lost. Resulted in increasing average order value by 12%, checkout conversion up 8%.

FellaFeeds Agency • 1 year 1 month

UX Designer

Dec 2020 - Dec 2021

Concept to launch product design for early stage startups across health tech, e-commerce, and education, including a telemedicine service, a wellness ecosystem, and an IoT fitness app.

AI Products ✨

built, not just designed

Internal AI tools built with Claude Code, adopted by 50+ designers, cut early product definition from weeks to days.

Discovery Engine

Turns a raw business requirement into build ready information architecture and UX artifacts, replacing days of manual synthesis at the start of every project.

Design System Generator & Validator

Produces reusable design foundations and flags inconsistencies before engineering handoff, keeping large multi module products coherent.

Conversation Flow Generator

Turns business objectives into structured conversational AI flows, ready to design against without starting from a blank page.

Skills

Product

Product Discovery, Product Strategy,
0 to 1 Product Design, Service Design,
Journey Mapping, Stakeholder Management

Research & UX

User Research, Usability Testing, Information
Architecture, Interaction Design, Design Systems

AI-Native

AI Assisted Design, Conversational AI, Workflow
Automation, Design Tooling (Figma Make, Cursor,
Claude Code)

Domains

Banking, Government, Healthcare, Telecom, Retail

Tools

Figma, FigJam, Framer, Lovable.dev, Jira

Education

IIM Indore

**Certificate Programme in Design Thinking &
Innovation for Business Excellence**

Expected 2026

Executive education in design thinking and innovation
strategy for business excellence.

JIMS Vasant Kunj

Bachelors • Computer Application

2018 - 2021
